-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

~~DETAILED ACTION~~ 7

DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 21, 23-26, 28-33, 35-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Simpson (US 6,457,532)

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

The first and second tubular are met by tubulars 200 and 205 which are located in the wellbore (see col. 1, lines 5-43). The roller expander is met by hydraulic roller expander Shown in Figs 4, 20, 21 which is anticipated to be rotated and expanded to create connection between tubulars 200 and 202 (see Figs. 9a-17b, and particularly Figs 29a and 29b). The pistons on the rollers is met by slidable pistons 120. The step of passing cement slurry into the annular is anticipated by col. 1, lines 6-10, because the '532 reference is anticipated for the creation of well casing in the well, the injection of cement slurry in the annulus at its completion is known and anticipated.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22, 27, and 34 are rejected under 35 U.S.C. 103(a) as being obvious over Simpson '532 in view of Abdrakhmanov et al '608.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art only under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 103(a) might be overcome by: (1) a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not an invention "by another"; (2) a showing of a date of invention for the claimed subject matter of the application which corresponds to subject matter disclosed but not claimed in the reference, prior to the effective U.S. filing date of the reference under 37 CFR 1.131; or (3) an oath or declaration under 37 CFR 1.130 stating that the application and reference are currently owned by the same party and that the inventor named in the application is the prior inventor under 35 U.S.C. 104, together with a terminal disclaimer in accordance with 37 CFR 1.321(c). For applications filed on or after November 29, 1999, this rejection might also be overcome by showing that the subject matter of the reference and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person. MPEP § 706.02(I)(1) and § 706.02(I)(2). Simpson shows everything with the exception of the threaded tubulars. Abdrakhmanov et al teaches the use of roller expander for the expansion of threaded tubular shown specifically in Figs 1, 2, 5 and 6. It would have been obvious to one of the skill in the art at the time the invention was made, to form a connection between two threaded tubulars similar to that of Abdrakhmanov et al, since such would have been a simple matter of design option between the selection of threaded tubular and unthreaded tubulars.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sivley, IV and Vercaemer et al all show expandable tubular and methods.
